

### REMARKS

In the Office Action mailed from the United States Patent Office on January 23, 2004, the Examiner objected to the drawings under 37 C.F.R. §1.84(p)(5) because they include the following reference sign not mentioned in the description: element 313. In the Office Action, the Examiner further objected to the disclosure because there is no description of element 313 (Figure 4).

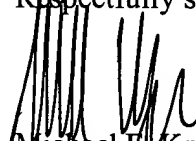

Accordingly, Applicant respectfully submits that the amendment made to the specification overcomes the objections made by the Examiner to the drawing set and to the disclosure since the amendment provides a description of element 313 of Figure 4. Further, Applicant respectfully submits that the Amendment made herein does not include new matter as it is supported by the application as originally filed. For example, the amendment is supported by the disclosure of claim 11 as originally filed. Applicant respectfully submits that this amendment overcomes all objections made by the Examiner, and is being made to comply with requirements of form expressly set forth in the Office Action.

### CONCLUSION

Applicant respectfully submits that the amendment made herein does not add new matter and that amendment places the application in a condition for allowance. Accordingly, Applicant requests favorable reconsideration. If the Examiner has any questions or concerns regarding this communication, the Examiner is invited to call the undersigned.

DATED this 5 day of February, 2004.

Respectfully submitted,

Michael F. Krieger  
Attorney for Applicant
